

ULTIMATE API MASTER GUIDE

Top 5 Gateways for Unlimited Claude & GPT Flagship Models

⚠️ CRITICAL RULE: OLD GITHUB ACCOUNT REQUIRED

In sabhi websites par register/login karne ke liye **sirf purana (Old) GitHub account** use karein. Agar aap freshly created naya account use karenge, toh inka anti-abuse system aapko login error dega ya turant block kar dega.

1. The Top 5 API Gateways

1. JustWoker (Top Choice)

[Open JustWoker](#)

Best for Claude Opus 4.8 & GPT 5.6. Supports both Anthropic & OpenAI formatting.

2. KSCSNKLI Dashboard

[Open KSCSNKLI](#)

Highly stable OpenAI compatible endpoint. Great for GPT flagship models.

3. TabiToken

[Open TabiToken](#)

Excellent stability for native Anthropic SDKs and heavy contextual tasks.

4. AgentRouter

[Open AgentRouter](#)

Dynamic proxy router for switching between multiple flagship models seamlessly.

5. TokenRouter

[Open TokenRouter](#)

Best for Qwen models. (Remember to append **-free** to the model ID).

2. Antigravity & Cline IDE Setup

VS Code / Cursor me AI Agents (Cline, Antigravity) use karne ke liye **OpenAI Compatible** configuration zaroori hai. **Base URL ke end me /v1 zaroor lagayein.**

1. Apne IDE me extension settings open karein.
2. API Provider me **OpenAI Compatible** select karein.
3. Details exact is format me paste karein:

- **Provider:** OpenAI Compatible
- **Base URL (Example):** <https://api.justwoker.icu/v1> (**MUST HAVE /v1**)
- **API Key:** Paste your generated API Key
- **Model ID:** [claude-opus-4-8-thinking](#) (ya gpt-4o)

3. Claude Desktop (Custom Gateway) 🧠

Claude app me direct gateway setup karne ke liye **/v1 NAHI lagana hai** kyunki ye native Anthropic format use karta hai.

1. Claude Desktop App open karein.
2. Menu: **Help → Troubleshooting → Enable Developer Mode.**
3. Bottom left Profile pe click karke **Inference configuration** open karein.

- **Gateway Base URL:** <https://api.justwoker.icu> (**NO /v1**)
- **Gateway API Key:** Paste your API Key
- **Auth Scheme:** bearer
- **Model ID:** claude-opus-4-8-thinking

4. Python Implementation (Anthropic SDK) 🦆

```
# Example using JustWoker / TabiToken API
import anthropic

client = anthropic.Anthropic(
    base_url="https://api.justwoker.icu",
    api_key="<YOUR_API_KEY>",
)

message = client.messages.create(
    model="claude-opus-4-8-thinking",
    max_tokens=1024,
    messages=[{"role": "user", "content": "Explain quantum entanglement in one paragraph."}],
)

print(message.content[0].text)
```
